3 **Read the following text, then answer the questions:**

Solar energy is energy from the sun, and it's the most sustainable energy source on Earth. Solar power can be captured and used in several ways to generate electrical energy for homes, businesses and more. Solar power is a clean, renewable source. Solar panels produce electricity by changing the continuous flow of energy from the sun into electricity. No pollution is produced into the air when electricity is produced by solar panels. It doesn't cost much money. The sun provides more than enough energy to meet the whole world's energy needs, and unlike fossil fuels, it won't run out anytime soon.

No greenhouse gases are produced when you use solar panels to create electricity. The sun provides more energy than we'll ever need, so electricity from solar power is a very important energy source in the move to clean energy production.

A) Choose the correct answer from a, b, c or d:

1. The passage is about ....

"Your visit to a habitat"

Life in deserts is hard because there's not much food or water. However, plants, animals and people found a way to live there. There are not many animals in the desert, but some animals are able to live in that habitat. Examples of animals that live in hot deserts are lizards, snakes, and camels. Small animals such as lizards live underground to avoid heat. They only come out at night to look for food. Like desert plants, desert animals can live on little water. Most of the water used by these animals comes from seeds that hold and keep water. Camels can live in hot deserts by storing water in their bodies.

"A review of social media"

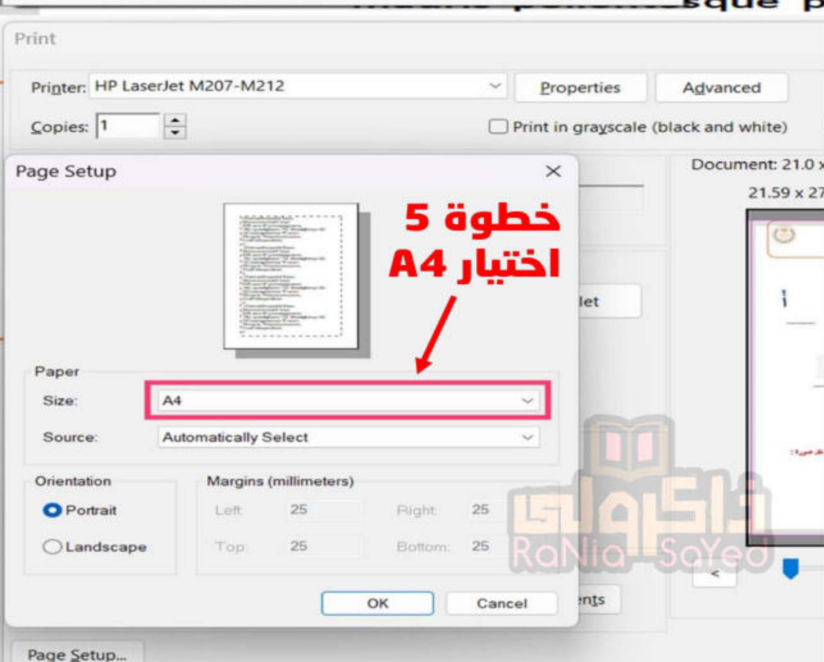

Social media has become an essential part of our daily lives. It allows us to communicate with friends and family, share our thoughts and ideas and stay informed about the latest news and events. There are many different social media platforms, such as Facebook, Instagram and Twitter. Each platform has its special advantages. While social media can be fun and useful, it also has its disadvantages. For example, spending too much time on social media can lead to addiction and affect our mental health. It is essential not to let social media control our lives. We can limit our time on these platforms and do other offline activities to be healthy.

3) Read the following, then answer the questions: (6 marks)

What do people need to light their homes and drive cars? Energy! It gives power to many things we need and use. Most of the energy comes from coal, oil, and gas. They are called fossil fuels. Those fuels come from fossils under the ground. Fossils are the remains of plants and animals that lived long ago. Burning fossil fuel pollutes the air. The air becomes dirty. That can be harmful to people, animals, and plants.

Now more people are using clean energy. The sun gives Earth heat and light. Some homes have solar panels on the roof. The panels collect sunlight and turn it into electricity. That kind of energy lets people do many things. For example, we use electricity to light our homes and watch television. Solar power can also be used to warm up the water in our homes. People can turn wind energy into electricity. Wind turbines are machines that spin when the wind blows. They make electricity. So what can we do to prevent or reduce light pollution? In our homes and work places, we should turn off lights that we do not need and make sure that our lights are only as powerful as they need to be.

❸ Read the following text, then answer the questions:

Road signs are an international language. It is important to have clear signs. They should avoid words and use pictures instead so that every motorist can understand them. There are three kinds of road signs. The first tells motorists "You must obey" and they always have a red circle around them.

We see them when motorists have to stop at a main road or when there is a one-way street where motorists must go the wrong way. The second tells motorists "You should be careful. It is dangerous to drive here." These signs have a red triangle around them. We see them when men are working on the road. Motorists don't have to obey them, but it is silly to ignore them. The third tells motorists where they are. It tells them " You ought to take this road. It is the shortest way." It tells them how many kilometers they have to travel.

Taking care of our teeth is very important. They are the first step in the process of digesting food. If food isn't ground well by the teeth, the stomach will not digest it well. Therefore, bodies will not get the benefits out of it. Dentists advise us to brush our teeth twice a day. We should brush the insides as well the outsides of the teeth. We ought to move the teeth brush gently up and down against each tooth. To keep your breath fresh, you should brush your teeth because it removes bacteria from your mouth. It is better to use soft teeth brush with a small head, so that you can get into the difficult spaces between the teeth. Finally, you should buy a new teeth brush every four months to keep our mouth clean and avoid going to the dentist.

3- Read the following, then answer the questions: (6 Marks)

Everything that is alive needs energy. All animals get the energy they need from food.Think about the human body as an amazing machine. It can do all kinds of things for us.Food is the fuel that helps keep the amazing machine running. Plants use sunlight to make their own food. Animals are not able to do that. Some animals eat plants. Some animals eat other animals as meat. People eat both plants and animals. Since plants make their own food using sunlight, the sun's energy is found in plants. The sun's energy is very strong. It loses a lot of its strength by the time it goes into a plant. When we eat plants, we get more of the sun's energy than when we eat animals. That's why it is good to eat fruits and vegetables. Like a car that has to be filled with gasoline living things have to eat again and again. Instead of gasoline, living things use food as fuel.

A: Choose the correct answer from a, b, c or d:

1) Where do all animals get their energy?

a) gasoline b) plants c) food d) people

2) …………….. can't use sunlight to make their own food.

Long ago, the ancient Greeks wrote a list of seven amazing places in the world. The places they chose were statues, a temple in Greece and a monument in Turkey, as well as the Hanging Gardens of Babylon in Iraq, the Great Pyramid at Giza and the Lighthouse of Alexandria. Only one of the original wonders of the ancient world is still standing: the Great Pyramid at Giza. Now, a new list of wonders has been written. In 1999, people all over the world were asked to suggest seven new places. It took six years to make the decision, but now the final seven places have been chosen.

The Taj Mahal in India is one of the places on the new list. It is a white marble monument, built in 1632 by the ruler of India to remember his wife. The monument was completed in 1648, but it took another five years to complete the fountains and gardens around it. The Taj Mahal, with its beautiful white dome and four minarets, has been visited by millions of people since it was built.

In fact, a good leader is always needed for successful work. I want to talk about a clever one of these leaders. I think she is a role model. She always motivates and encourages people around her all the time. She never feels bored or sad because she is a cheerful one. Once she gets tired of doing something, she smiles and gives us hope to go on. Also, she never lets us feel bad or get lost while working. In addition, she has made a complete change in dealing with problems and solving **them**. Her advice at work is "Never feel upset, never feel stressed and never put much pressure on you."

When she knows about something bad that has happened to a friend, she feels it herself and starts to help at once. One of her sayings is "Teachers at schools are like our brothers and sisters. They are actually our colleagues. We should help them to be better". Unluckily, this great woman retired, but she is and will ever be with us.

Osama's class have been learning about the environment in their science lessons. Students have been studying the effects of pollution from vehicles. They also have been reading about how poisons from factories pollute rivers and seas. They all agree that everyone should do more to help the environment. Their teacher, Mr. Helmy asked them to think of things that they could do. The students made lots of suggestions. Radwan said that people should walk more and use their cars less. This would keep the cities cleaner and people would be healthier. Khaled said they should build car parks outside the city centre where people could leave their cars. They could then walk the rest of the way into the city. Osama suggested having a bottle bin in the school where students could put their empty plastic bottles. **These** could be collected and recycled. Mr Helmy thought these were very good ideas and said he would pass them on to the head teacher.
